### DETAILED ACTION

#### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/09/04 has been entered.

#### ***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

The claimed invention is directed to non-statutory subject matter. In particular, claim 1 is drawn to nonfunctional descriptive material – see MPEP 2106, section IV B1 (b).

The examiner interprets the claim (claim 1) as being drawn to purely non-functional descriptive material. There is no functionality/tie in with the information recited as being recorded onto the medium.

Claim 1 is rejected under 35 USC 101 as being drawn to non-statutory subject matter – see above.

#### ***Response to Arguments***

2. Applicant's arguments with respect to the claim have been carefully considered; nevertheless, there is a lack of functionality of the information/data found on the record medium. Applicants' attention is drawn to *In re Lowry, (CAFC) 32 USPQ2nd 1031*.

The examiner concludes that as presented the claims fail to satisfy the requirements as further analyzed with respect to Lowry (supra). The examiner proffers the following suggestion as illustrative only: In line 13 of claim 1, phraseology to wit:

"such as/so that the beginning/ending of the program number is properly identified."

Art Unit: 2653

The examiner interprets the second management data as that indicative of the program numbers as found on page 38 of the specification, hence the above example. If this is incorrect, proper functional tie in with at least one of the claimed information/data areas needs to be included in order to overcome the above rejection.

### **Conclusion**

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Goto (5508984) – see abstract and description with respect to the TOC area (management area, including title of each program).

Moriguchi – abstract and description with respect to figure 3 program, titles etc. and col. 5 lines 20 plus.

Dockes et al – see abstract and description with respect to the tables starting at col. 12, programs, titles, etc.

Kurakake et al – see the abstract and the description with respect to attribute information following the “.” (col 9 lines 32 plus).

Matsumoto et al with respect to the delimiters.

Utsumi – abstract and the description with respect to col. 43 plus with respect to the special code “title settle code”.

Takaku et al/EP 655740/Yokata et al as previously cited.
